Experience

1. Intern at Alta Rail Technology.

Alta Rail Technology offers technological solutions that increase the profitability, productivity and safety of railway operations.

A company that has the railway business in its DNA. ART comes from the spin-off of a railroad that, together with the investment from the American fund Darby, a division of Franklin Templeton, acquired two other Brazilian metro-railway technology companies, which made it possible to expand to several countries.

- April 2021 to October 2021

2. Junior Full Stack Engineer.

We were founded in 2015 as a digital product studio for a new generation of startups.

Since then, we've launched digital products and services for a wide range of businesses, from category-defining startups to some of the world's largest organizations.

We now have offices in two countries and work with clients around the world, helping innovators solve important problems and bring new ideas to life.

- October 2021 to Dezember 2022

3. MidLevel React Native Engineer.

We are a Healthtech founded in February 2018 and built on a technological base capable of producing and selling products and services with advanced technological content for the health area, which benefits operators, their beneficiaries and cooperative members.

Working at AppUnimed.com which has more than 1.5 million users, growing by 50 thousand each month, using several new technologies.

- Dezember 2022 to moment
